WHAT WE BELIEVE

Every company, challenge, and solution is unique, but what remains true is there is a correct path to take when discovering the proper solution.

At RedSeam, we are mental and creative navigators. We are not experts in any one industry, but what we specialize at is giving you the proper tools, processes, and designs to meet the needs of your clients and to discover the right path for your company.

OUR EXPERIENCE

DESIGN TEAM

RedSeam Creative has over 10 years experience working in the creative design industry. We have helped companies with full brand development, print material design, digital development, product design, and innovation consulting. We bring a wide range of life and professional experiences to give every client a unique and customized design voice.

About Us

The Dominguez-Roth Foundation was created to help bring integrative medicine into the mainstream through fundraising, facilitating community awareness, funding integrative medicine research and clinical trials, and delivering programs designed to provide patients with access to these valuable treatments.

Our mission is to lead the way in finding a balance in the treatment and prevention of serious illnesses utilizing a combination of integrative and conventional medicine.

Our Program

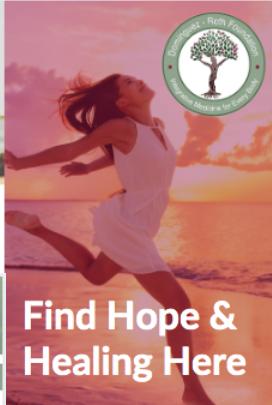

What Suits Your Body is a 3-month custom-tailored integrative medicine program designed to get to the root of your unresolved debilitating illnesses or ongoing health challenges. We partner with you to help uncover underlying causes of your illness and regain optimum health, using integrative modalities including but not limited to acupuncture, chiropractic adjustments, yoga, nutritional supplements, and meditation.

Dr. Marcela Dominguez, Executive Director

Dr. Dominguez is one of a select number of doctors in the country who is an expert in integrative oncology. She has extensive training in naturopathic and bioidentical hormone replacement, functional medicine, nutrition, and herbal therapy. Her approach to health is based on the belief that it is important to combine many scientifically proven modalities to treat patients using an evidence-based, team approach that focuses on resilience, self-care, and prevention.

Dr. Marcela Dominguez is a UCSD School of Medicine faculty and sees patients at The UCI Susan Samueli Integrative Health Institute. She founded and currently serves as the President of the Board of Directors of the American

What is Integrative Medicine?

Integrative medicine seeks to restore and maintain health and wellness by understanding and addressing the causes of an illness, not just treating the symptoms. It encompasses the full range of physical, emotional, mental, social, spiritual and environmental influences that affect health by utilizing therapeutic options from conventional Western medicine, as well as proven holistic practices, to achieve optimal health.

Benefits

- Discover root causes of underlying abnormal cellular and organ dysfunction that leads to unwanted symptoms and disease
- Help restore normal cellular and bodily function to maximize healing, vitality, and long-lasting optimal health
- Prioritizes therapies that are the least harmful, least invasive and most cost-effective
- Providers and patients form a close partnership in transforming health

We help you medically investigate the underlying root causes of your unresolved symptoms and chronic illnesses using an integrative approach. We do this systematically by utilizing a combination of the best modern science and proven natural healing traditions, and then put your customized wellness plan into action, working together to create the vibrant health you deserve.

What is Integrative Medicine?

Integrative medicine seeks to restore and maintain health and wellness by understanding and addressing the causes of an illness, not just treating the symptoms. It encompasses the full range of physical, emotional, mental, social, spiritual and environmental influences that affect health by using therapeutic options from conventional Western medicine, as well as holistic practices, to achieve optimal health.

Treatment is unique for each patient, depending on the set of circumstances involved. The result is a personalized health plan for your unique physical and emotional needs.

Benefits

- Discover root causes of underlying abnormal cellular and organ dysfunction that leads to unwanted symptoms and disease
- Help restore normal cellular and bodily function to maximize healing, vitality, and long-lasting optimal health
- Prioritizes therapies that are the least harmful, least invasive and most cost-effective
- Providers and patients form a close partnership in transforming health
